ABOUT THE PROJECT

Organizational Sustainable Investment (SOI) PROJECT N°: 2024-1-IT02-KA210-ADU-000249310 is an Erasmus+ project focuses on promoting sustainable practices within grassroots organizations, aligning them with the European Union's sustainability policies, especially the European Commission's Corporate Sustainability Reporting Directive (CSRD). This project will help these organizations plan, execute, and communicate their sustainability efforts, preparing them for future compliance and contributing to a greener, more sustainable society.

Project Result n. 1

During the first months of the project life, partners worked to the production of the first Project Result: the **Strategic Digital Guide for Organizational Sustainability**.

The Guide contains information on the concept of sustainability, starting from what the EU policies in this area provide, up to the description of the practices to be implemented within a local organization (micro-entity) to translate these theoretical concepts into operational procedures and strategically align with the community directives, exploiting the benefits and advantages deriving from being compliant with the sustainability directives implemented by the EU

*Welcome to
SOI Project*

1st TPM in Matera

On **12th and 13th December 2024** the Kick-Off Meeting of our new Erasmus+ Project SOI "Sustainable Organisational Investment" took place in Matera, Italy.

The 1st Transnational Meeting was a remarkable gathering that set the stage for fruitful collaboration and innovation within the SOI project.

Partners were warmly welcomed at the Studio Risorse headquarters, where they had the opportunity to **present their organisations** and contribute their unique expertise. The coordinator had the possibility to **describe the project to the other partners and share with them the timeline, but also the steps to follow in order to implement all the project activities and the strategies to adopt within administrative and dissemination fields** Our team is dedicated to making a difference in small organizations that want to strategically align with sustainable practices that meet the EU environmental and sustainability policy
